

GMT-GRIND | Grain Moisture Tester

Smallest sample size of any portable grain tester!

Ideal for Pre-Harvest Decisions

Part No. 08201

Fast and accurate solution for determining the moisture content of grain – before, during and after harvest.

FEATURES:

- New, more accurate grinding test cell
- Sturdy carry and storage case
- Easy-to-read LCD display
- Aluminum cabinet and test cell made of hardened steel
- Calculation of average value of up to four measurements
- Individual offset adjustment on each grain
- Display of battery voltage
- Cleaning brush and operating instructions included

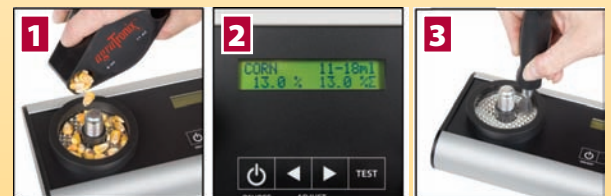

SPECIFICATIONS

Battery Included	9 volt alkaline installed
Accuracy	± 0.5% of grain moisture (below 18%)
Calculation of Average Measurement	Automatic average on the last four measurements
Offset Adjustment	± 10% on each grain
Display Contrast	Adjustable
Tester Enclosure	Aluminum
Test Cell	Hardened steel
Weight	4.4 lbs.

Available Grains: Corn, Soybean, Wheat, Barley, Beans, Broad Bean, Buckwheat, Caraway, Durum Wheat, Linseed, Meadow Grass, Meadow Fescue, Millet, Mustard, Oats, Paddy Rice, Peas, Rape, Red Fescue, Rye, Ryegrass, Red Clover, Spelt, Sunflower, Timothy, Triticale, Turnip Rape, Wheat Flour, White Clover, Winter Barley, White Rice

EASY AS 1, 2, 3!

- 1** Measure and pour grain into the test cell
- 2** Tighten cap, press test, moisture is displayed
- 3** Clean grain from the test cell
