MANIFOLD FLANGE CONNECTIONS

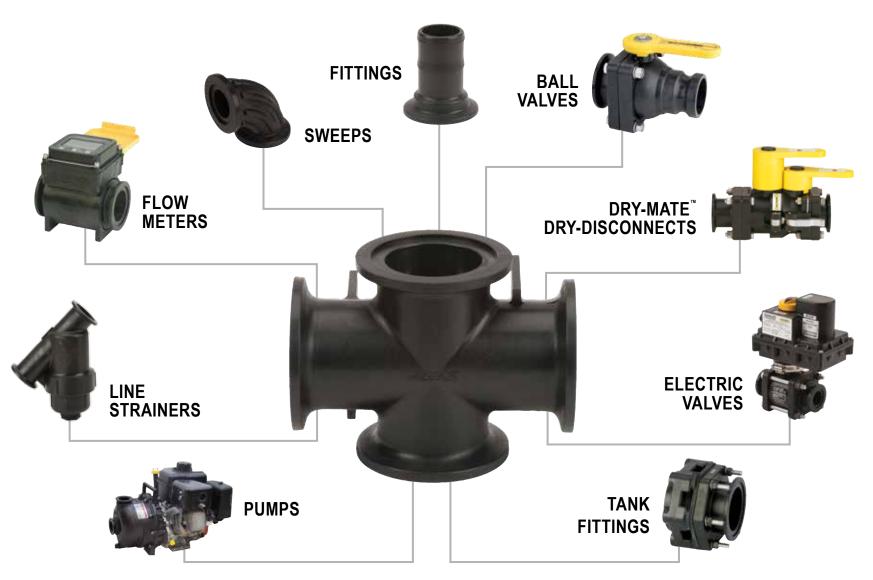

# MANIFOLD FLANGE CONNECTIONS SAVE YOU TIME AND MONEY WHILE AVOIDING THE INSTALLATION HEADACHES OF THREADED PIPE

### FLANGE CONNECTIONS FOR EVERY PRODUCT

## WHAT OUR CUSTOMERS SAY

- Banjo's biggest **innovation** was when they came out with the flange fittings... it's just light years ahead of where we were before. **Eliminating leaks** and being able to **reconfigure** things is so easy.
  - Chad Middlemas, Domestic Sales Manager Hagie

- With a threaded system, I have to start at one end or the other and take parts apart until I get to the piece I need. As you can imagine, it takes a lot more time to mess with the threaded parts.
  - JD England, Product Support Equipment Technologies

#### NO THREADS. NO SWEAT.

#### **GET RIGHT TO THE SOURCE**

With Banjo manifold flange connections, the days of spending hours unhooking entire systems of valves and fittings are over. You can directly isolate and replace the problematic part or replumb sections without disassembling the whole system.

#### SKIP THE TAPE AND SEALANT

Flange connections utilize clamps instead of threads, facilitating quick and easy assembly and disassembly while ensuring a leak-proof system. Threaded pipe needs tape or sealant, and the slightest imperfection in the pipe or seal can cause a leak. With properly installed flange connections, you won't worry about connection leaks or wait for sealant to cure.

#### SAVE TIME. SAVE MONEY.

Time spent unthreading systems and repairing leaks from faulty connections is unproductive and ultimately hits your pocketbook. Banjo's manifold flange systems get you back in the field and out of the shop in no time.

# MANIFOLD FLANGE CONNECTION ASSEMBLY

Clamps and gaskets make a quick, easy and secure seal.
