

ALL NEW 1-1/4" & 1-1/2" EXTRA FLOW TANK VALVES

A-1406-G, A-1406-FBV AND A-1809-BFV

Continental NH3 Products is excited to announce its brand new line of EXTRA FLOW tank valves, the A-1406-G, A-1406-FBV and the A-1809-BFV. The A-1406-G and A-1406-FBV has been redesigned with a new excess flow check that is 40 percent bigger than any other 1-1/4" tank valve. Install these valves in your 1000 gallon nurse tanks and we guaranty you'll go faster than you have ever have before. And for the larger tanks with 1-1/2" connections we have the A-1809-BFV, its one big freaking valve. This all new valve body has a full port 1-1/2" seat and an all new excess flow check that is 41 percent bigger than anything else out there. The picture below just doesn't do it justice. We guaranty you will be impressed or your money back. If you are looking for faster speeds and flow rates then consider giving these valve a shoot. They won't let you down.

A-1809-BFV

A-1406-G
