

NEWLY REDESIGNED A-HFC-114R

Continental NH3 Products is proud to introduce our newly redesigned 1-1/4" high flow tool bar coupler A-HFC-114R. It's the same coupler you know good and well with one big improvement. We have incorporated a disconnection feature that helps insert and remove the male end. All that is needed to insert and remove the male tip is a 3/4" wrench. Turn the disconnection bolt clock wise will open the coupler and allow of easy removal and insertion. Maintenance of your equipment is very important and with this new disconnection feature it's easier than ever to keep it clean and lubricated. Give it a shot, we think you will love it.

- **Same standard mounting bolt pattern**
- **All new disconnection bolt allows for easy insertion and removal of male tip**
- **Bleeder valves included**
- **Easy to keep clean and maintain**
- **Includes our revolutionary locking collar, no locking bearings**
